50373 SMART PULSE™ VAC

- 1 Airstream puffs into filter.
- 2 Filters alternate pulsing.
- 3 Vacuum stream continues uninterrupted.

The Smart Pulse™ vac is designed with two filters and an integrated sensor. The sensor is continuously monitoring suction efficiency. When a pressure difference inside the vac vs. the outside of the filter is recognized by the sensor, the vac begins an alternating pulsing cycle, back-flushing air through the filter. This process cleans the filter automatically, yet only when needed, providing uninterrupted performance and maximizing efficiency.
