

### AHNC Series Pressure Gauges

- Stamped aluminum 2.5" diameter dial
- Dual English/metric scales (psi/kPa)
- $\pm 1.6\%$  accuracy
- Polished stainless steel case
- Glass lens, pressed bezel
- Bronze tube and brass socket with brass movement
- 1/4" male NPT back connection
- Glycerine fill provides a dampening effect which minimizes pulsations; continuously lubricates gauge movement; and makes this gauge ideally suited for adverse environments
