The **KS-04/05 Series Reversible Temperature Strips** provide a constant and reliable indication of current temperature status. The reversible, reusable strips change color when temperatures increase or decrease, and are constructed with non-toxic encapsulated thermochromic liquid crystals. The temperature strips are self-adhesive, and have an accuracy of $\pm 2^{\circ}\text{F}$ ($\pm 1^{\circ}\text{C}$). These reversible strips are resistant to oils, water and steam—ideal for monitoring pipes, food storage areas, transportation climate control, equipment monitoring, pharmaceutical or medical applications.
