

# Why test portable gas detectors one by one, by one, by one, when you can test 4 at once?

## Reduce testing time and gas usage with our portable or wall mountable MGC Pump Dock.

You can keep testing your multi gas detectors one at a time, or you can test them all in no time, when you use ultra-reliable MGC Pump portable gas detectors, from Gas Clip Technologies, together with the MGC Pump Dock or MGC Pump Wall Mount Dock.

### Accurately test and record all data for each monitor.

You name it, and the MGC Pump Docks can do it. They accurately test, record and store information that is critical to maintain safety in your company. They provide individual monitor event logs, firmware, unit configurations and, of course, bump/calibration logs. The robust 4+ GB USB gives you all the memory you need and the lithium ion battery ensures thousands of tests before needing to be recharged.

### Test 4 detectors at a time, up to 12 per minute!

Our MGC Pump Docks let you bump test and calibrate 4 detectors at once for LEL, H<sub>2</sub>S, CO and O<sub>2</sub>. With one dock, you can bump test up to 12 detectors in a minute, which saves valuable time and reduces the use of testing gas. The MGC Pump Dock, or MGC Pump Wall Mount Dock, is compatible with all MGC Pump detectors (Infrared or Pellistor).

### Call today, or visit [www.gascliptech.com](http://www.gascliptech.com).

These reliable portable multi gas detectors and docks are proven to help facility workers and contractors do their jobs safely, productively and cost effectively. To learn more about the MGC Pump Dock, MGC Pump Wall Mount Dock and the unmatched dependability of the MGC Pump, call or visit our website. Every second counts.

Portable gas detectors you can count on.
