## Paddle Type Flow Switch for Liquids

- Switch Point Adjustable
- Easy to Install
- Brass or SS Construction
- Low Cost
- Maximum Pressure, Brass: 1450 PSIG
- Maximum Pressure, SS: 3625 PSIG

## Description

The KOBOLD PSR and PS are simple, economical and reliable monitors for flow switching applications. They operate as follows: The flowing media presses against the paddle fitted to one end of a balance arm which is in direct contact with a pre-stressed leaf spring. At the other end of the arm is a permanent magnet. This magnet actuates a reed contact in a bistable fashion located within a movable housing located outside of the media. The reed contact switches on or off depending on the position of the magnet and the switch housing. The switch status may then be used to control flow as the contacts can be set to normally open or normally closed. The PSR is made of brass or stainless steel with 1/4" NPT to $1-1 / 2^{\prime \prime}$ NPT fittings. The PS is made of brass or stainless steel with a $1 / 2^{\prime \prime}$ NPT fitting and is designed for installation in 2" to 8 " pipes. Common applications include: cooling and lubricant circuits, dry running protection for pumps, prevention of low water levels, and monitoring for pipe breakage.

## Specifications

| Switching Tolerance: | $\pm 15 \%$ |
| :--- | :--- |
| Media Temperature |  |
| Brass/NBR Seal: | $-4 \ldots 158^{\circ} \mathrm{F}$ |
| SS/FPM Seal: | $14 \ldots . .230^{\circ} \mathrm{F}$ |
| Ambient Temperature |  |
| Brass/NBR Seal: | $-4 \ldots 158{ }^{\circ} \mathrm{F}$ |
| SS/FPM Seal: | $-4 \ldots .0^{\circ} \mathrm{F}$ |
| Max. Pressure | $1 / 4^{\prime \prime} \ldots 1^{\prime \prime}=1450$ PSIG |
| Brass: | $1-1 / 4^{\prime \prime} \ldots 1^{\prime \prime 1 / 1 / 2^{\prime \prime}=360 \text { PSIG }}$ |
|  | $1 / 4^{\prime \prime} . .1^{\prime \prime}=3600$ PSIG |
| SS: | $1-1 / 4^{\prime \prime} \ldots 1-1 / 2^{\prime \prime}=580$ PSIG |
|  | IP 65 |
| Ingress Protection: | Horizontal Flow Preferred |
| Mounting Orientation: | $5 \times$ Switching Range, Increasing |
| Max Flow Rate: |  |

Maximum Contact Ratings (cCSAus):

| SPST Contact: | $2 \mathrm{~A}, 20 \mathrm{~V}_{\mathrm{AC}}, 0.18 \mathrm{~A}, 230 \mathrm{~V}_{\mathrm{AC}}$, |
| :--- | :--- |
|  | $\max .40 \mathrm{~W}$ |
| SPDT Contact: | $0.13 \mathrm{~A}, 150 \mathrm{VAC}, 0.5 \mathrm{~A}, 40 \mathrm{VAC}$, |
|  | $\max .20 \mathrm{~W}$ |

Model PS

Model PSR

Cable:
Cable Length:

PVC Jacketed
Standard: 5 Ft. (1.5m)
Optional (SPST only): 10, 15 or 21 Ft.

## Materials

|  | PSR/PS-51.. | PSR/PS-52.. |
| :---: | :---: | :---: |
| Case | MS58 Brass | 304 SS |
| Paddle | 304 Stainless Steel |  |
| Leaf Spring | 301 Stainless Steel |  |
| Balance Arm | 301 Stainless Steel |  |
| Sleeve | MS58 Brass | 304 SS |
| Magnet | Oxide Ceramics |  |
| Seal | NBR | FKM |
| Contact Tube | Polyamide, Glass Reinforced |  |

*U.S. Patent Number: 4,827,092

## Dimensions

Model PS-.. 49
Models PS-.. 52 and PS-.. 14

| Model | D1 | L2 |
| :---: | :---: | :---: |
| PS-..49 | $1 / 2^{\prime \prime}$ NPT | $2.32^{\prime \prime}$ |
| PS-...52 | $1 / 2^{\prime \prime}$ NPT | $2.83^{\prime \prime}$ |
| PS-..14 | $1 / 2^{\prime \prime}$ NPT | $5.12^{\prime \prime}$ |

## Switch Point Setting

To adjust the switch set-point, slightly loosen the two screws that secure the locking washer at the top of the casing and move the contact unit. Blue/white \& red arrows located on the contact unit serve as an adjustment aid. The front edge of the locking washer serves as an adjustment mark.

## N/O Contact

The switching volume may then be adjusted at the red arrow. The minimum switching values specified in the table are set by moving the contact unit in the flow direction. The maximum switching values noted in the table are set by moving the contact unit against the direction of flow. Evenly tighten the two screws that secure the locking washer after the desired settings have been made.

## N/C Contact

The switching volume may then be adjusted at the blue/white arrow. The minimum switching values specified in the table are set by moving the contact unit in the flow direction. The maximum switching values noted in the table are set by moving the contact unit against the direction of flow. Evenly tighten the two screws that secure the locking washer after the desired settings have been made.
